

Portable Gas Monitor

ToxiRAE II

The ToxiRAE II single gas monitor continuously displays toxic gas concentrations and costs just a little more than disposable detectors. Unlike typical disposables that only display remaining life, the ToxiRAE II is a full-featured gas monitor providing continuous, digital display of the gas concentration, STEL, TWA and Peak values as well as high, low TWA, and STEL alarms. The ToxiRAE II does not have a pre-programmed expiration date so you get the full life out of the battery and sensor. Sensors and battery are easily replaced in the field.
